Date of Assessment: October 5, 2021

Part 2 – Summary of Comments

The following indicates the forum at which the comments were made and the applicable *market participant* class, if any, of the person making the comment.

Technical Panel Comments:

Prior to the June 29th Technical Panel meeting, the TP member representing Residential Consumers, provided comments on omnibus proposals R00, R03 and R04. Corrections were made on items where warranted, or where greater clarity could be achieved by rewording. Two items in particular that the Technical Panel member noted were not addressed; edits to correct for improperly referenced defined terms were not made in this omnibus to reduce the volume of material that Technical Panel members would need to review, and amendments proposed in one proposal were not made in the other proposals. Specifically, amendments proposed in R03 are not contained in proposal R04, and vice versa, in order to support the clarity of each proposal. When this was presented at the June 29th Technical Panel meeting, the member representing generators expressed concern that the removal of a section of Chapter 5 related to the reporting of outages contained in proposal R00 may have unintended consequences. The IESO decided to remove this proposed amendment from the omnibus.
