

Member Vote and Rationale – Enabling Co-located Hybrid Model

IESO Technical Panel, February 21, 2023

The vote to recommend the proposed market rule amendments (MR-00474) for consideration to the IESO Board of Directors passed unanimously at the February 21, 2023, Technical Panel meeting.

MR-00474 - Enabling the Co-located Hybrid Model

TP Member	Vote and/or Rationale
Nick Papanicolaou (Consumer)	For
Indra Maharjan (Consumer)	For
Forrest Pengra (Residential Consumer)	For – Rationale - I am in support of Voting to Recommend. Given that there was no stakeholder feedback received and minor revisions from the TP, the market rule is ready to move forward. The MR's flexibility for market participants will benefit Ontario's residential consumers by enabling more resources and capacity.
Emma Coyle (Generator)	For

TP Member	Vote and/or Rationale
Jason Chee-Aloy (Renewable Generators)	For
Jennifer Jayapalan (Energy Storage)	For
Vlad Urukov (Generator)	For
Robert Reinmuller (Transmitters)	For – Rationale - Co-located hybrid model is needed for expanding resource capabilities across the province and increasing availability of generation in a more predictable way. Hydro One is supporting this change with ensuring that the required engineering studies are completed and equipment and customer impact are fully assessed.
Rob Coulbeck (Retailers or Wholesalers)	For
Dave Forsyth (Consumer)	For
Ron Collins (Energy Related Businesses and Services)	For
Sarah Griffiths (Demand Response)	For
Joe Saunders (Distributor)	For

TP Member	Vote and/or Rationale
David Short (IESO)	For
