Subject: CFF / IAP Comments

Hi Nik,

Confirming our discussion of February 23, the following are AMPCO's high level comments on the Final Report for the CFF/IAP Mid Term Review. They are generally in alignment with comments already provided by other industrials.

I am happy to discuss, if you have any questions.

- IAP program is not sufficiently flexible.
- The IAP process is overly administrative and could be streamlined.
- There needs to be some harmony achieved between related programs (electricity conservation and GHG, for example).
- Timeframes are too short for industrial customers. Many Industrial projects are multi-year and cannot be completed within the existing short time frames.
- AMPCO is not in favour of the transfer of target and budget from IAP to CFF. AMPCO believes that addressing the above issues would increase subscription to the IAP.

Regards,
