Subject: Provincial Energy Manager Program Development - Update

Thank you for your continued interest and support throughout the development of the Provincial Energy Manager Program, specifically, the Sector Based Energy Manager stream.

Together with input from stakeholders, the IESO has proposed a design for a Sector Based Energy Manager Program that offers support for various market sectors, to realize energy savings opportunities and to support the development of a culture of conservation in Ontario. This proposed program will complement other energy manager initiatives currently being offered by local distribution companies (LDCs) and the IESO. Sector Based Energy Managers will be procured through an open request for proposal (RFP) process targeting aggregated groups of customers to achieve proposed energy savings.

For those interested in the Sector Based Energy Manager RFP, the IESO intends to post the RFP this summer (2016) with a notification to stakeholders to accompany the posting.

Once again, thank you for your continued interest and direct support towards implementing a Sector Based Energy Manager Program within this initiative.
