Subject: Seeking Feedback on the Provincial Energy Manager Program
Attachments: Draft Scope Document for Comment Sector Based Energy Efficiency Program 26-nov-2016.pdf

As a continuation of the engagement launched in 2015 on the provincial energy manager program, the IESO is seeking public comments on the draft Sector Based Energy Efficiency Program scope of work and funding schedule. This document was influenced by past [stakeholder feedback](#) given through the engagement, is attached to this email and will be available later today on the [engagement page](#).

The IESO welcomes your comments and provides the following questions for consideration to help guide your feedback (please feel free to provide comments and feedback outside of these questions).

Questions for Consideration:

- Does the scope of work provide enough information without being overly prescriptive on how savings will be achieved in any particular sector?
- Does the proposed funding schedule which includes a pay-for-performance model present too much of a risk for sector associations to respond?
- Is there enough information in the scope of work coupled with your sector knowledge to help you estimate the number of Save on Energy incentive applications required to achieve Dec 31, 2020 total energy savings target?

Please submit your feedback by email to engagement@ieso.ca by December 14.

The IESO will collect and assess all feedback received and will post an aggregate of the feedback ensuring anonymity is maintained for the respondents. The feedback along with the IESO's response will be posted by early January.

Thank you for your interest and participation in this initiative.

Thanks – IESO Engagement

This email is being sent to past participants of the Provincial Energy Manager Program Development Engagement
