Subject: Seeking Feedback Provincial Energy Manager Program

Please find our feedback pertaining to the Draft Scope Document for the IESO proposed Sector Based Energy Efficiency Program.

1. *Feedback responses will be posted in January:* Will feedback responses be sent to individual respondents or will respondents have access to all feedback questions/clarifications and responses. If it is the latter, how will this be communicated?
2. *The Draft Scope states that the target date for achieving energy savings is December 31, 2020 over an approximate 4 year term.* This would indicate that the projects would be starting in December 31, 2016. Is there an established or estimated deadline for Proposal submission, awarding of contracts and Program start?
3. *Preferred target sectors:* Light to medium manufacturing/processing is not included in this grouping. Based on our energy management and conservation experience, this sector has significant energy savings opportunities. Can this sector be added to the program or included under the commercial category?
4. *Significant geographic area:* How is this being defined? Is the IESO going to provide a “region” map to signify specific areas?
5. *Energy Management Plan will be due no later than 3 months after contract start.* When will the EMP be made available to respondents?
6. *Capability Building Projects: Measurement and Verification and documentation to evaluate the persistence and energy savings attributed to Capability Building Target Measures.* How is this quantified and how does this relate to target achievement?
7. *Clients based across multiple geographic areas:* There are situations where a Client has buildings/facilities that are situated in different geographic areas. If the respondent has completed or is working on projects with the Client in the respondent’s selected “Energy Efficiency Program” area and wants to continue to engage with the respondent on projects that are outside of the selected area, is this permitted under the program?

We look forward to submitting a proposal to participate in the program.

Best Regards,
Colette Cooper
