Subject: TR Market Review - Stakeholder Engagement Update
Attachments: TR Market Update_Dec 19_2014.pdf

This email provides an update on the Transmission Rights (TR) Market Review stakeholder engagement initiative.

Following the completion of phase one of the TR Market Review stakeholder engagement, the IESO initiated the implementation of an interim maintenance process last July to support the revised confidence level for the IESO's Transmission Rights (TR) Market. The attached paper provides an update on the delay of the commencement of phase two of this engagement, which is intended to be a comprehensive review of the TR market as a whole.

In summary, the IESO will seek consideration and input from stakeholders next year on a number of potential enhancements to Ontario's real-time electricity market which have the potential to impact the IESO's Transmission Rights (TR) Market. As such, the IESO is proposing to defer phase two of this engagement until other impacts and/or enhancements can be identified through those stakeholder discussions.
