Subject: TR Rights Market Review - Engagement Complete

Good Morning,

The IESO would like to take this opportunity to thank all stakeholders who have been involved in the [Transmission Rights \(TR\) Market Review](#) engagement over the past few years and notify the TR stakeholders that the formal engagement for Phase I of this work is now complete. The contribution from our stakeholder community has allowed for an efficient and productive engagement process to take place which has resulted in the updating of both the reports and the process to enable the balancing of TR congestion rents and payouts on a per path basis. Furthermore, on most transmission rights paths, the new process has provided a reduction in long-term transmission rights quantities while providing flexibility in short-term transmission rights offerings.

As a reminder, Phase II of this review will not be included within this particular engagement and therefore the TR Market Review engagement page will now be moved to the [Completed Engagements](#) page on the [ieso.ca](#). The work identified in Phase II may be included in the scope of upcoming engagements, or a new engagement in the future perhaps. The IESO will communicate any such opportunities to the stakeholder community in advance to encourage involvement.

Once again, thank you all for your participation and contribution to this important initiative. The IESO values stakeholder interaction in past, current and upcoming engagements.

If you have any questions or concerns, please contact us at engagement@ieso.ca.

Thanks – Jason
