Subject: New Meter Data Distribution Solution Technical Webinar

The IESO is launching a new metering data distribution (MDD) solution which will replace the MV Web application currently used to view, request and download revenue metering data. The MDD solution will now have participants download meter information through the IESO reports site. In addition to standard reports that will be delivered daily and monthly, participants can also create ad-hoc reports through [Online IESO](#).

To assist participants in preparing for the cutover from MV Web to MDD, participants are invited to attend a technical webinar at 1:00 pm on Tuesday, August 4, 2015. The purpose of this webinar is to provide participants with an opportunity to ask technical questions relating to revenue meter data report profiles, EDI file format, and downloading revenue meter data reports from the IESO Reports site. To register for the webinar, please send an email to stakeholder.engagement@ieso.ca.

The following documents are provided for your reference in advance of the webinar:

[IESO Quick Take for Meter Data Reports – Profiles and Details](#)

[Revenue Metering Reports EDI Guide](#)

EDI-867 Sample File 1 and EDI-867 Sample File 2 with DTM Flags can be found at:
