Subject: Draft Minutes & Reminder for Feedback - Settlement Meter Data Applications Working Group (SE-113)
Attachments: SMDA Session 6 Minutes (final draft) - Aug 8 2014.pdf; se113-20140807-Meter_Data_Distribution-Presentation.pdf

Dear Working Group members,

The IESO would like your feedback on two items before the end of the day on **Thursday, August 14**, an extension from the original deadline of Tuesday, August 12:

1. Minutes from the August 7 meeting from those who attended (attached)
2. Discussion questions presented at the meeting (see attached presentation) and a new question, all of which are copied at the bottom of this email

Your feedback – whether positive, negative or neutral – is very important, as we would like to ensure that the proposed solutions meet your business needs.

Please respond to this email address with your comments and questions. Please also let us know if you would like to have a one-on-one meeting with the project team, or more time to consider the proposal.

Thank you very much,
IESO Stakeholder Engagement

DISCUSSION QUESTIONS

- Will your organization require guidance from the IESO to process the data received through the proposed new system to replicate the graphical reports received through MV-WEB?
 - And if so, which MV-WEB reports? (See appendix B in the attached presentation for a complete list)
- What is your preferred format for training? (via recorded presentation, Web-Ex, on-site, etc.)
- Do you have a business need to retrieve validated or totalized meter data older than 90 days?
 - And if so, how often does this need arise? How quickly do you require the historical information to meet your business needs?
- **(NEW)** What period (older than 90 days) of data would you typically require? For example; 6 month old, 1 year, etc.
- Do you have a business need to be able to retrieve prior versioned Validated Meter Data Reports? Or do you only require the most current version of the Validated Meter Data Report for a given Trade Day?
