Subject: Settlement Meter Data Applications WG - IESO Response to Stakeholder Feedback and Next Meeting

Thank you for your participation and input into the Settlement Meter Data Applications Working Group. The comments received during and after the last working group session have helped to provide the IESO with a better understanding of how MV-Web users will be affected by proposed changes to data retrieval in the new system. Where clarification and additional information was needed, the IESO followed up with one on one meetings. Responses to the comments have been posted on the working group's webpage at <http://www.ieso.ca/Pages/Participate/Stakeholder-Engagement/SE-113.aspx>.

As a result of the feedback, the IESO has recognized the need to provide guidance in replicating the graphical reports currently available in MV-Web, as well as providing a mechanism for system users to request data older than 90 days. Details on how these needs will be met will be subject to discussion at future working group meetings.

The project team is currently working on strategies to handle ad-hoc meter data requests within and beyond 90 days. We will be discussing these strategies at the next working group meeting, which is scheduled for Monday, December 8 at 10:00 am. To register for this session, please email stakeholder.engagement@ieso.ca.

Regards – Hanna Smith
