
Ontario's changing electricity sector: A focus on reliability, efficiency and engagement

Leonard Kula

VP, Planning, Acquisition and Operations and COO

SW Ontario Regional Electricity Forum

November 8, 2018

Connecting Today.
Powering Tomorrow.

Why are we here?

- Learn about Ontario's changing electricity sector
- Share ideas and opinions
- Discuss energy in the context of community development
- Ensure community voices are considered in decision-making
- Celebrate local successes and innovations

Ontario's evolving electricity sector

- Transition to a more decentralized model
- Role of distributed energy resources
- Consumer engagement
- Ways to align provincial, regional and local energy plans

Benefits of market renewal

- Find new efficiencies
- Opportunities for new technologies
- Reduced costs to consumers
- Focus on system needs
- Greater reliance on competition
- Better use of existing assets

Electricity planning in Ontario

Community engagement

- Critical to the success of the IESO's decision-making process
- Provides insights into local needs, preferences and priorities
- Many ways to engage
