

Memorandum

To: Technical Panel
From: Robert Doyle
Date: April 30, 2019
Re: MR-00437: Demand Response – Registration and Metering Requirements

At its meeting on April 16, 2019, the Technical Panel agreed to hold a Technical Panel meeting on May 2 to:

- address the outstanding questions from Technical Panel members; and
- review any stakeholder feedback prior to conducting the Technical Panel vote on the amendment.

Following the April 16 Technical Panel meeting, IESO staff and Resolute confirmed the outstanding information with the Technical Panel by email. Those submissions from the IESO and Resolute are also posted on the Technical Panel [webpage](#).

Also included in the Resolute package are supplemental answers to questions which Resolute has advised have been asked in separate discussions with individual Technical Panel members. The IESO was not aware of nor did it participate in those specific discussions.

The IESO's position continues to be that matters such as Resolute's registration in the Demand Response Auction are part of the subject of the ongoing dispute between Resolute and the IESO, rather than as part of the Technical Panel's consideration of this market rule amendment proposal. While the IESO does not expect any additional submissions to be presented by Resolute or IESO staff at the May 2 meeting, the IESO can provide further clarification on the supplemental questions if requested by Technical Panel members.

The Resolute rule amendment was posted for stakeholder comment from April 16 - 26. No additional stakeholder comments were received.

Panel Action and Next Steps

Once the Technical Panel has discussed the responses to the outstanding information requests, the IESO recommends that the Technical Panel proceeds with a vote to recommend or not recommend the amendment proposal to the IESO Board of Directors for consideration at its June 12, 2019 meeting. Each Technical Panel member's vote will be recorded and each member will have the opportunity to provide rationale to support the position a TP member has taken in

the vote, including a summary of any objections in accordance with the Market Rules, Chapter 4, section 4.3.14.5.

As discussed at the April 16, 2019 meeting, the IESO will not be supporting Resolute's proposal. The IESO believes that the proposed amendment would have an adverse impact on the IESO's reliable and efficient operation of the IESO-controlled grid and would introduce inconsistency in the manner in which participants are treated in the IESO-administered markets.
