Member Vote and Rationale – MRP Market Entry and Prudential Security Batch

IESO Technical Panel, April 20, 2021

The vote to provisionally recommend the proposed market rule amendments (MR-00450-R00, MR-00451-R00, MR-00453-R00-R04, MR-00461-R00) to the IESO Board of Directors passed at the April 20, 2021 Technical Panel meeting.

MR-00450-R00, MR-00451-R00, MR-00453-R00-R04, MR-00461-R00 – MRP Market Entry and Prudential Security Batch

TP Member	Vote and/or Rationale
Ron Collins	I recommend MR-00450, MR-00451, MR-00453, MR-00461:
(Energy Related Businesses and Services)	Market Renewal Program: Market Entry and Prudential Security to the IESO Board for consideration based on the following rationale:
	The proposed amendments to IESO Market Rules reflect the essential modifications to enable the advancement of a single schedule market, provide greater operational certainty, reduce cost of scheduling resources, while enhancing the clarity of definitions.

Vote and/or Rationale

Joe Saunders (Distributor)

I voted "In Favour", to recommend to the IESO Board for consideration, amendment to the Market Rules (MR-00450, MR-00451, MR-00453, MR-00461), Market Entry and Prudential Security Batch. These batch amendments to the market rules will enable market participant authorization, facility registration and prudential support. At the March 23,2021 Technical Panel Meeting, the TP voted to post for broader stakeholder comment. As a result of this stakeholder engagement, written comments were received from Ontario Power Generation and Capital Power. The comments received were discussed with the Technical Panel, with the result of IESO making changes to the batch amendment based on TP comments and written comments received through the stakeholder engagement process.

Following the stakeholder engagement process and TP discussion, I voted in favour to recommend the batch amendments to the IESO Board for consideration.

(Generator)

Subject to the review of subsequent Proposed Rule Amendment Packages related to the Market Renewal Program, and without prejudice to the ability to revise my recommendation based on the review of such subsequent packages, I provisionally recommend that the IESO Board approve the Proposed Market Rule Amendments contemplated in MR-00450-R00, MR-00451-R00, MR-00453-R00-R04, and MR-00461-R00 also referred to as "Market Renewal Batch 1".

Market Renewal Batch 1 has gone through the stakeholder engagement process and includes changes reflecting recommendations by the stakeholder community and the Technical Panel. Overall, the Rule Amendments reflect the Participant Authorization, Facility Registration and Prudential Security requirements essential in laying the foundations of the Market Renewal Program.

As shared at the April 20, 2021 Technical Panel meeting, and as per the process outlined by the IESO at the November 10, 2020 Technical Panel meeting in a document titled "Proposal fore Review and Recommendation Process", I am noting that Market Renewal Batch 1 contains proposed Rule Amendments I am unable to evaluate in regards to their effectiveness in meeting the contemplated design. I recommend that the IESO maintain a list of such items, in order to ensure that they are addressed and dispositioned in the future when all relevant proposed Rule Amendments have been made available to the Technical Panel.

David Forsyth

(Market Participant
Consumers)

After reviewing the material and subsequent discussions regarding the MRP – Market Entry and Prudential Security Batch, and the commitment by the IESO to address several outstanding items in future MRP Market Rule Amendments, I voted in favour of Provisional Recommendation of the proposed amendments to the IESO Board. I believe the amendments reflect the intent of the stakeholder engagement process and Technical Panel discussions.

TP Member	Vote and/or Rationale
Sarah Griffiths (Demand Response)	I vote to approve (provisional) the Market Rules as presented at the April 20 th Technical Panel meeting. The community I represent appreciates the provisional nature of this support. In particular the market rules surrounding facility registration (MR-00451 r00) and participant authorization (MR-00450 r00). As new resources and resource types enter the IESO administered markets issues/challenges may be identified. The ability to review the market rules in the context of the entire package will be beneficial.
Jennifer Jayapalan (Energy Storage)	I voted in favour of provisionally recommending the first MRP Batch: Market Entry and Prudential Security. I support the intent of the proposed amendments and understand and support recommending this batch now in order to continue to work through the MRP Batches. However, my support is based on the understanding that this batch will be reviewed and updated as the work evolves. In particular, this includes an evaluation and potential amendments to facility registration to ensure inclusion of electricity storage before Market Renewal goes live.

David Short (IESO Member)

In representing the IESO, I believe the proposed rules meet the intent of MRP's detailed design and reflect the input of many stakeholders. Stakeholders and IESO staff are commended in working through the detailed design and now this first batch of rules to help us all move towards making fundamental changes to Ontario's electricity market.
