Vlad Urukov	For
(Generator)	As stated by the IESO in a memorandum accompanying the proposed Rule Amendment dated June 7, 2022, the proposed "changes for the 2022 Capacity Auction are intended to increase competition and competitiveness, clarify participation expectations and incent improved performance from all resource types." I believe the proposed changes are in line with these objectives and have incorporated feedback from the stakeholder community. Stream 2 completes the work the IESO undertook in Stream 1 and will allow for the overall evolution of the Capacity Auction procurement approach. I encourage the IESO to adopt a flexible and responsive approach to participant feedback and to focus on transparency and timely stakeholder engagement that allows participants for adequate preparation for participation.
