Subject: 2017 DR Workplan

Hello,

Below, please the 2017 DR Workplan Priorities from the Nest Labs perspective.

- 1) Peak DR resource for weather-sensitive loads (this would also eliminate concern about duration of activations). It should also be noted that priority #1 is very dependent on the #2 priority.
- 2) Easy access to residential measurement data
- 3) Varying DR capacity obligations
- 4) Reduce minimum energy market resource size to 100 KW
- 5) Eliminate virtual zonal DR limits

Please let us know if you would like to discuss further.

Best regards,

Utilia
