### **January 30<sup>th</sup> DRWG Meeting Update:**

The January 30<sup>th</sup> DRWG meeting has been modified to include time at the back end of the meeting for a discussion led by the Single Schedule Market (SSM) engagement team. As many of you may know, the SSM is an initiative within the IESO's [Market Renewal Project](#) and DRWG members are being invited to participate in that discussion if they are available and interested to stay as there are synergies between the two scopes of work. Attached is the [DRWG agenda](#) for your review which contains the topics that will be covered from 9:00am – 1:30pm. If the working group determines it necessary, the IESO is open to a webinar between the January 30 and March 1 meetings to complete any unfinished DRWG-specific business that may exist.

### **SSM Meeting:**

DRWG members are being encouraged to participate in the SSM meeting which will take place immediately following the DRWG meeting. Below is some background on the January 30<sup>th</sup> SSM meeting and discussion topics that the DRWG may find relevant when considering whether/if they will participate in the meeting.

#### **Single Schedule Market**

*January 30<sup>th</sup>, 2:00 – 5:00pm  
Four Points, Toronto*

The SSM meeting will be discussing a preliminary decision regarding how dispatchable and non-dispatchable load will be priced in an SSM. Specifically, the two pertinent agenda items are:

#### Load Pricing

A discussion of the preliminary decisions regarding load pricing in a single schedule market, including price granularity (nodal, zonal or uniform) for dispatchable and non-dispatchable resources

#### Financial Transmission Rights

A discussion regarding how the congestion and loss residuals could be disbursed to dispatchable and non-dispatchable resources
