May 3, 2018

# DRWG Work Plan

A review of the 2018 DRWG workplan priorities:

| <b>Proposed 2018 DR Work Plan</b>                              |                                |
|--|--------------------------------|
| <b>Confirmed Priority</b>                                      | Improved Utilization of DR     |
|  | Facilitating DR Input into ICA |
|  | Review Webpage                 |
| <b>Additional Review/<br/>Discussion to Determine Priority</b> | Utilization Payments           |
|  | Review Testing                 |
|  | Review Metering Requirements   |

# DRWG Work Plan, cont'd

- DRWG work plans are intended to guide our focus and determine an appropriate schedule for that calendar year
- A significant amount of time, effort and resources from DRWG members and IESO has been dedicated to achieving the priorities set out by this working group
- This forum was directly involved in facilitating improvements to Demand Response in Ontario, including but not limited to: *Capacity Obligation Transfer, EOSCA, Standby Report Price Threshold, Activation Duration, etc.*)

# DRWG 2018 Schedule

- Propose to meet at least two more times in 2018: **August & November** (with additional webinars as required)
- August will include a discussion on the Pre-Auction Report and the November will begin discussions toward drafting a 2019 DRWG work plan
- All DRWG meetings will continue to address priorities in the work plan and any other priority items as they arise
- DRWG members will continue to shift more focus toward the **ICA engagement**, especially as we approach the High Level Design expected in March/April 2019.
