Subject: Next NER-SC Meeting

The next NERSC meeting will be held on February 16 at the Four Points by Sheraton Toronto Airport (6257 Airport Road, Mississauga). The meeting will run from 9 am until 2 pm and will be followed at 2:30 pm by a webinar for the Request for Information (RFI) for non-emitting resources. NERSC attendees are invited to remain in the room to participate in the webinar.

The majority of the NERSC meeting will be focused on a workshop for attendees to identify barriers to participation and brainstorm on potential solutions to address them. Attendees are encouraged to participate in person. **In order to have a successful meeting NERSC members are asked to come prepared to answer the following questions:**

1. What do you see as the potential for your resource type in terms of meeting Ontario's electricity needs i.e., MW and location in the Ontario system?
2. What value streams/services can your resource type provide?
 - At the bulk level
 - At the distribution level
 - At the consumer level
3. Are there value streams/products to which your resource can contribute that you are not currently capturing?
 - In the current market
 - In the future market as contemplated through Market Renewal
4. For such value streams/products, what is preventing you from capitalizing on the value you create?
 - (e.g., technology, wholesale market structure, regulatory, contractual, other)
5. What changes to the current market structure, or existing products would enable you to more fully capture the value your resource creates?
6. What changes to the future market structure, or new products as contemplated under Market Renewal would enable you to more fully capture the value your resource creates?

These questions will be explored in smaller breakout teams and findings will be reported back to the larger group.

The remainder of the NERSC meeting will be spent providing an update on the upcoming technical conference and beginning a discussion related to the modelling exercise that will support phase 2 of the NERSC's work (market efficiencies). Materials for the meeting will be circulated in advance of the meeting.

We look forward to seeing you and hearing your perspectives on February 16.
