

James Pigeon

James has been involved in the evaluation, design, implementation, and operation of wholesale electricity markets at the New York Independent System Operator (NYISO) for over 16 years. His tenure at the NYISO includes work in Market Design and Information Technology. As Manager of Distributed Resources Integration he is currently responsible for integrating distributed energy resources (DER) into the NYISO wholesale electricity markets in support of New York State's strategic public policy objective called Reforming the Energy Vision (REV). His work at the NYISO aligns with the company's DER Roadmap, which includes developing market concepts related to aggregation, measurement & verification, performance obligations and dispatchability of DERs.

He has been involved in a wide array of projects at the NYISO, including integrating renewable technologies into the marketplace, working with emerging storage and generation technologies, enhancing interregional trade, improving overall market efficiency as well as the design and implementation of NYISO market systems.

He earned a Bachelor of Engineering degree in Computer Engineering from Clarkson University in Potsdam, New York.
