Subject: IMDC - Curtailment of Wheel-Through Transactions to Prevent a Nuclear Shutdown: Update and Next Steps

Thank you for your comments received on the IESO's Interim Market Document Change (IMDC) for curtailment of wheel-through transactions to prevent a nuclear shutdown.

In response to the feedback received during the webinar as well as through the stakeholder comment process for the IMDC, the IESO has revised the IMDC and anticipate posting a new version of the document today, Thursday May 12. The revision will clarify and emphasize the rationale that the IESO will curtail linked wheel-through transactions for reliability.

Consistent with our IMDC process it will be posted once again for a five day comment period before becoming effective on May 20th. In addition to this posting, the IESO is will post a response document to provide further context - for clarity, the IESO will group responses by theme.

Regards,
IESO Engagement
