Subject: Grid-LDC Interoperability

Thank you for participating in the webinar on November 25 to discuss the development of a [Grid-LDC Interoperability and Data Sharing Framework](#). The webinar included representation from a variety of local distribution companies and other sector participants and provided an opportunity to outline the draft Framework document as well as share examples of how some of the opportunities within the Framework are currently being used in real-time IESO – LDC operations. The written feedback received as well as the IESO’s response is posted [here](#) . Other feedback on the webinar was positive and the IESO will take steps to continue these discussions with a focus on providing an ability to learn and share perspectives.

The IESO expects to announce a new Grid-LDC Interoperability Standing Committee next week along with an invitation to participate in this Standing Committee as well as draft Terms of Reference. The announcement will be published in the IESO’s Weekly Bulletin and passed along to registered attendees from the November 25 webinar.

Please email engagement@ieso.ca if you have any questions.

Regards - Susan Harrison
