PART 3 – DESCRIPTION OF THE ISSUE

Provide a brief description of the issue and reason for the proposed amendment. If possible, provide a qualitative and quantitative assessment of the impacts of the issue on you and the *IESO-administered markets*. Include the Chapter and Section number of the relevant *market rules*.

Summary

The IESO proposes to amend the market rules to explicitly identify the obligation of transmitters, distributors and other market participants to comply with disconnection orders issued by the IESO to give effect to a suspension order, termination order or an IESO ordered de-registration of a market participant's facilities due to persistent breaches of the market rules.

In addition, the IESO proposes to amend references to disconnection orders within the grid connection requirements of the market rules in order to create consistency regarding the types of market participants to whom the IESO may issue a disconnection order.

Background

Market rule amendment MR-00335-R00: Revisions to the Suspension, Termination, and Disconnection Provisions for Events of Default approved by the IESO Board in June 2008, introduced a number of changes to address identified shortcomings of the market rule enforcement provisions in section 6 of Chapter 3. The amendments granted the IESO the authority to issue disconnection orders to a "host" market participant where the defaulting market participant is embedded within or behind the "host" market participant's facility. Prior to the amendment, the IESO was only permitted to issue disconnection orders to transmitters and distributors.

While MR-00335-R00 granted the IESO authority to issue disconnection orders to a transmitter, distributor or other market participant under Chapter 3 sections 6.3A.4.3, 6.4.3 and 6.5.3, the amendment did not include an obligation for participants to comply with such disconnection orders. Similar obligations exist in the market rules to ensure transmitters, wholesale customers, generators and distributors comply with IESO directions related to the IESO's responsibility of maintaining reliability (Chapter 5 sections 3.4 – 3.7) and for transmitters and distributors to comply with IESO disconnection orders related to disconnections during an emergency, for safety or reliability reasons (Chapter 4 section 6.3.2).

To address this oversight the IESO will introduce a new section to the market rules to obligate transmitters, distributors and other market participants to comply with disconnection orders issued by the IESO in relation to events of default identified in section 6 of Chapter 3.

PART 4 – PROPOSAL (BY SUBMITTER)

Provide your proposed amendment. If possible, provide suggested wording of proposed amendment.

Amend the market rules to explicitly identify the obligation of transmitters, distributors and other market participants to comply with disconnection orders issued by the IESO to give effect to a suspension order, termination order or an IESO ordered de-registration of a market participant's facilities due to persistent breaches of the market rules.
