

Memorandum

To: Technical Panel
From: Rebecca Short
Date: September 19, 2017
Re: MR-00432: Ancillary Services – Mandatory Requirements for Regulation Service Providers

Attached for Technical Panel review and consideration is market rule amendment proposal MR-00432-R00.

The IESO proposes amendments to the market rules to increase the transparency and consistency of performance requirements for all registered facilities providing regulation service. The proposed amendments will clarify that certain performance requirements – off-nominal frequency, speed/frequency regulation, and voltage ride through – apply to all regulation service providers, regardless of size, technology or connection location. In addition, the proposed amendments will clarify that telemetering requirements apply to all regulation providers regardless of connection location.

At its meeting on August 15, 2017, the Technical Panel agreed to post MR-00432-R00 for stakeholder review and comment for a period of two weeks, ending August 31, 2017. No stakeholder comments were received during the posting period.

There are no changes to the amendment proposal since the Panel's last review.

Panel Decision Required

The IESO recommends that the Technical Panel vote to recommend MR-00432-R00 to the IESO Board for consideration at its meeting on October 25, 2017. The recommended effective date is November 17, 2017.
