Subject: Update - Foundation Working Group Next Steps

Thank you for a successful session on July 22. At that meeting, the IESO discussed having a meeting in August to continue the work of the group. After further consideration, the IESO believes it will be more effective to provide updates and seek feedback via email to Foundation Working Group stakeholders over the month of August with an aim to ensure that proposals at the September meeting reflect and are informed by stakeholder input. As such, the additional meeting in August proposed at the last Foundation Working Group session has been **cancelled**.

Next steps are outlined below.

- Stakeholders are asked to provide any further comments on the materials discussed at the last meeting by **August 4th**.
- The IESO will circulate for comment a revised proposal for a data de-identification framework, compiled in the form of a discussion paper on August 11th. Stakeholders will be asked to provide written feedback by **August 24th**.
- On August 25th, the IESO will circulate a revised discussion paper on the framework for third party access. Stakeholders will also be asked to provide written feedback on this topic by **September 4th**.

All comments and feedback can be submitted to stakeholder.engagement@ieso.ca

The object is to ensure that the Foundation Project can continue to advance in key areas moving toward the meeting on **September 16th** while ensuring the best use of time and resources for all participants.

Thank you for the time and effort you have devoted to the Foundation Project.

Ryan King
