**Subject:** Invitation to Participate in Market Trials for Facility Registration in Online IESO

As part of the next stage of the Online Registration Project stakeholders are asked to provide feedback on Facility Registration processes that will be moved into Online IESO. The Facility Registration stage of the project focuses on the processes associated with registering new facilities and managing data relating to facilities and their equipment. The existing processes capture facility information through facsimile, forms and email and require IESO staff to manually validate, compile, and input the information into IESO systems. By moving these processes to Online IESO, it is expected that the facility registration process will:

- Be more efficient for participants and the IESO to execute and
- Improve the level of service provided to participants.

The IESO will be inviting organizations with recent facility registration experience to participate in the market trials for the Facility Registration Automation phase of the Online Registration Project. Market trials will run from June 15 to June 26, 2015. Participants in the trials will be asked to complete specific test scenarios related to registering facilities.

- Register a small generation facility,
- Replace an Automatic Voltage Regulator (AVR) on a synchronous generator and replace a generation facility breaker, and
- Register a small load facility.

All data and supporting documentation needed to complete the test scenarios will be provided to all participants in the market trials.

A webinar to demonstrate the new Facility Registration in Online IESO is scheduled for Monday, June 15 at 10:00 am.

Please send an email to [stakeholder.engagement@ieso.ca](mailto:stakeholder.engagement@ieso.ca) to register to participate in the market trials and/or the webinar. Please provide the names of the individuals who will be conducting the testing and attending the webinar. Requests to participate in the market trials can only be accepted until Friday, June 5, 2015.
