Subject: Facility Registration in Online IESO is scheduled to go in-service on December 1, 2015.

As part of the next stage of the Online Registration Project, the Facility Registration processes will be moved into Online IESO. Registering new facilities and managing data relating to facilities, resources and their equipment will no longer be completed through facsimile, forms and email. IESO staff will no longer compile, and input your information into our IESO systems. By moving these processes to Online IESO, it is expected that the facility registration process will:

- Be more efficient for participants and the IESO to execute,
- Improve the level of service provided to participants, and
- Allow you to review your data you have with us.

The IESO is inviting organizations with facilities registered with the IESO to participate in the final phase of market trials to be held from November 2 to November 13. Participants in the trials will be asked to complete one or more test scenarios related to registering a generation or load facility and managing their resource relationships. All data and supporting documentation needed to complete the test scenarios will be provided to all participants in the market trials. A webinar to demonstrate the new Facility Registration in Online IESO and prepare market trial participants is scheduled for Monday, November 2 at 10:00 am.

Please send an email to stakeholder.engagement@ieso.ca to register to participate in the market trials and/or the webinar. Please provide the names of the individuals who will conduct the testing and attend the webinar. Requests to participate in the market trials can only be accepted until Friday, October 23, 2015.

Additional information about Facility Registration in Online IESO can be found at:
