Re: SE-109 Outage Management Process Redesign – Comments for April 1st meeting

OPG would like to offer the following comments and feedback on the material presented at the April 1, 2015 stakeholder session.

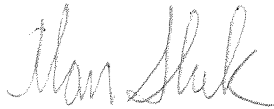

1. Requirements Summary Document Changes

Regarding Appendix H, the Other Cancel Code and Other Purpose Code under the Planned Priority Code require a free text description as per the footnotes. Will the Other Purpose Code under the other Priority Codes also require a free text description? Currently there is no indication they will require one.

2. Proposed Outage Planning Guideline

The examples presented on the Outage Planning Guideline in the meeting were all pertaining to transmission outages. OPG would request several examples of generation outage conflicts in this Guideline in order to assess and provide comments on the format.
