Subject: SE109 Feedback Request
Attachments: SE109_Presentation_Feb_23_16_Final_v2.pdf

Thank you to those who participated in the February 23, 2016 webinar of the Outage Management Process Redesign. At this time, we are seeking feedback on the materials referenced at this meeting.

[Feb 23/16 presentation material](#) (attached for your quick reference) – Please provide feedback via email to engagement@ieso.ca by **Friday, March 4, 2016**. The following suggestions are meant to help guide your feedback, however, please feel free to comment on any aspect of the material.

1. Outcomes of Web Client Testing (Slides 4 - 13).
2. Approach for changes to Market Manual 7.3 (Slides 14 - 17). Please note that an actual copy of the updated market manual will be made available in April for stakeholders review and comment in advance of market trials. The manual will be posted on the IESO's Change Notifications Listing web page and a communication will be sent out to notify stakeholders.
3. Proposed Training Plan for Market Trials and Go Live (Slides 18 – 21).

Please contact engagement@ieso.ca if you have any questions.

Thank you - Rick Romeo
