**Subject:** SE-109 -Notification of Market Manual 7.3 Outage Management Upcoming Change

Please note that a draft version of “Market Manual 7.3: Outage Management” has been posted to the [Change Notification Listing](#) webpage. The document has been completely rewritten to reflect outage management related market rules and software changes expected to take effect on September 14, 2016. The document is not redlined, however a description of change made from the current version can be found in the table of changes section of the document.

The purpose of this review is to provide stakeholders with an early opportunity to review the document, provide feedback and become familiar with the new process in advance of the market trials scheduled for July 2016. Once feedback is considered and incorporated, a final review of the manual will be performed beginning in July as part of Baseline 36.0.

Please provide your feedback via email to [pending.changes@ieso.ca](mailto:pending.changes@ieso.ca) by **Friday, May 6, 2016**.

Thank you - Rick Romeo
