Subject: Notification of Market Manual 7.3 Outage Management Upcoming Change

Importance: High

Please note that a redlined version of “Market Manual 7.3: Outage Management” has been posted to the [Change Notification Listing](#) webpage. Stakeholder feedback received from the initial review conducted in April 2016 has been incorporated and the manual has been edited for further clarification.

The market manual reflects outage management-related market rules and software changes expected to take effect on September 14, 2016. The Table of Changes provides a description of changes made from the current version.

This review is being performed as part of Baseline 36.0. Please provide your feedback via email to pending.changes@ieso.ca by **Friday, August 5, 2016**.

Thank you - Rick Romeo
