Subject: Next Meeting and Feedback Requested - Outage Management Process Redesign (SE-109)

To all participants in the Outage Management Process Redesign (SE-109)

The next meeting of the [Outage Management Process Redesign \(SE-109\)](#) will be held on **September 4, 2013** from 9:00 am to 11:00 am in Mississauga. Please email stakeholder.engagement@ieso.ca to register to participate in person or via webinar.

For your information, on August 13 the IESO Technical Panel unanimously voted to post the draft Market Rules supporting the Interim Process Redesign for stakeholder comment. These draft Rules are posted on the [Market Rule Amendments](#) webpage. The stakeholder comment period on the draft rule amendment will close September 5, 2013.

As discussed at the August 7 meeting, **please provide feedback on the following topics by August 23, 2013:**

1. Interim Process Feedback:

- a. Comments on the Interim Process design as presented at the August 7 meeting
- b. Suggestions for pre-approved outage criteria. What types of outage requests would you prefer to see included in the criteria. Please consider scope and impact when providing your feedback, for example:
 - i. Status of equipment (unavailable vs. testing vs. derated)
 - ii. Duration of work and recall times
 - iii. Impact to the transmission system (level of unavailability/reduced capability vs. loss of redundancy)
 - iv. Impact to other participants (transmitter to customer and vice versa)

2. Final Outage Management Process Redesign:

- a. Comments on the recent changes to the rules of compensation in the Final Redesign Proposal
- b. Feedback on the capabilities you would like to see incorporated in a new outage management software solution to help support the objectives of this redesign, namely improved outage management-related services and process efficiencies.

Please email your comments/feedback to stakeholder.engagement@ieso.ca

Thank you
