Subject: RE: Feedback Requested and Next Meeting - Outage Management Redesign (SE-109)

Thank you for providing the opportunity to provide feedback. Below is our feedback.

1. Feedback on the software design updates (Slides 7 to 9).

Page 5 of the presentation material provide an example of how the software will manage the actual start and end times of a non-continuous derate profile. On page 9 of the presentation a new 'VARIES' constraint code is introduced. Will an outage request with the 'VARIES' constraint code transition between states in a similar manner as the example shown on page 5?

2. Security and Adequacy Reporting Recommendations to Support Outage Planning Under the Redesign Process (Slides 10 to 12).

In general we support the publication of material in these reports that support the Market Participant in assessing when to schedule outages. In particular in the presentation at the June 4, 2014 SE-109 meeting (slide 3) the IESO indicated that the information required to calculate the reserve margin is available in the 18 Month Outlook but will require Market Participant to perform the calculations. We support the IESO calculating and publishing the reserve margin in the 18 Month Outlook rather than asking the Market Participant to calculate it.

Subject: Feedback Requested and Next Meeting - Outage Management Redesign (SE-109)

Thank you to those who participated in the August 27 meeting of the Outage Management Process Redesign. At this time, we are seeking feedback on the materials referenced at this meeting.

[August 27 presentation material](#) (attached for your quick reference) – Please provide feedback via email to stakeholder.engagement@ieso.ca by **Friday, Sept 5, 2014**. The following questions are meant to help guide your feedback, however, please feel free to comment on any aspect of the material.

3. Feedback on the software design updates (Slides 7 to 9).
4. Security and Adequacy Reporting Recommendations to Support Outage Planning Under the Redesign Process (Slides 10 to 12).
5. Proposed Stakeholder Engagement Plan during the Software Implementation Phase (Slide 13).

Outage Management Redesign Requirements Summary - In addition, please find attached the Outage Management Redesign Requirements Summary document. Feedback on this document is encouraged, especially from participants using an Application Programming Interface (API) to submit outage requests to the IESO. Please submit feedback on the Requirements Summary via email to stakeholder.engagement@ieso.ca by **Friday, Sept 12, 2014**.

Next Meeting – October 15 from 09:00 to 11:00 am. Please email stakeholder.engagement@ieso.ca to register to participate in person or via webex.

Please contact stakeholder.engagement@ieso.ca if you have any questions.

Thank you,
Rick Romeo
