Subject: Update - Settlement Meter Data Applications Working Group (SE-113)

The IESO thanks members of the Settlement Meter Data Applications Working Group for their input to date. The project team has been working on the design of the new system with the input in mind. The next phase of the project, which will be discussed at a webinar in Q2, will be the design of the Portal interface for the new system.

In the meantime, the project team would like to provide working group members with an update on the project's development and get feedback the following items in the coming weeks:

1. Method of retrieving data: To be discussed at a webinar scheduled for **Thursday, February 6** from 9 am to 11 am
2. Testing approach: To be discussed at a webinar scheduled for **Wednesday, February 19** from 9 am to 11 am.

If you are interested in attending either or both of these webinars, please send confirmation to stakeholder.engagement@ieso.ca. Updated information will appear on the SE-113 webpage (http://www.ieso.ca/imoweb/consult/consult_se113.asp) shortly.

Thank you,
IESO Stakeholder Engagement

This is being sent to the Settlement Meter Data Applications Working Group (SE-113) participants
