Subject: Smart Metering Entity Licence Order Working Group

RE: Smart Metering Entity Licence Order Working Group

This communication is to advise stakeholders who participated in the **Foundation Stakeholder Engagement** that the IESO/Smart Metering Entity (SME) has established a working group in response to a decision from the Ontario Energy Board which will require the SME to begin collecting additional data beginning 2017. The working group is comprised of a broad selection of LDCs across the province and representatives from OEB, the Ministry of Energy and the Electricity Distributors Association (EDA). The IESO will look to involve the broader stakeholder community as this initiative evolves. For the time being, we wanted to ensure Foundation Stakeholders were made aware of these activities. Here is a link to the Working Group [webpage](#) for your information.

Regards,
Ryan King –Stakeholder Engagement

+++This communication is being sent to all stakeholders in the Foundation Stakeholder Engagement+++
