Subject: Comment from Nest Labs

Hello there,

Thank you for including us in the DR Working Group.

As you know, we have not participated in past DR Auctions, but we are examining the opportunity to do so in the future.

One idea we would like to discuss further is the concept of have a subcommittee of the DR Working Group looking at DR for the residential market. It needs to be recognized that the large commercial/industrial sector is very different from the residential sector. This will not only require tweaking of the rules, but also in the way the private sector can engage in that market.

Thank you, again, for involving us in this very important discussion and we look forward to future meetings.

Best regards,

Utilia
