**Subject:** DRWG Feedback Regarding DR Capacity Obligation Transfer Proposal

Good Afternoon,

We believe that the Post-Auction Summary Report should only provide each DRAP's available MW for transfer similar to PJM. It would still allow other participants to view which DRAP's are available to participate in transfers without disclosing their complete energy commitments.

### The IESO proposes to publish the qualified capacities of all auction participants in the Post-Auction Summary report

- Allows DR Auction Participants to see who is available to participate in transfers

Summer Commitment Period			
Zone	Participant	Qualified MW	Cleared MW
Southwest	DRAP1	10	10
	DRAP2	10	5
	DRAP3	15	12
	DRAP4	5	0

Thanks,
