Dear IESO Engagement:

**Re: IESO Brant Local Demand Response Pilot – DRAFT RFP**

EnerNOC is pleased to provide comments on the Demand Response Workplan for 2017 that IESO staff presented to the DRWG at the November 30<sup>th</sup>, 2016 meeting. EnerNOC agrees with the stated goal for DR to “Achieve greater value and economic use of DR through IESO-administered market, maximizing opportunities through continuous improvement”.

The stated priorities for 2017, focused on how Hourly DR (HDR) resources are called upon in the energy market, will assist meeting the IESO goal. EnerNOC looks forward to working with IESO staff and other members of the DRWG to implement changes to improve the dispatch of the resource for the benefit of the system, the customer and the ratepayer.

EnerNOC found the November 30<sup>th</sup> planning session an effective way to hear from DRWG members on how to improve the DR resource in the IESO system and would recommend that similar sessions take place on a yearly basis to ensure participants have input on improvements and ideas for the DR resource.

Yours truly,

Sarah Griffiths  
EnerNOC
