

## ONTARIO ENERGY BOARD NOTICE

**The Association of Major Power Consumers in Ontario has applied for a review of amendments to the market rules made by the Independent Electricity System Operator regarding the Transitional Capacity Auction and to stay the operation of the amendments.**

On September 26, 2019, the Association of Major Power Consumers in Ontario (AMPCO) filed with the Ontario Energy Board (OEB) an application under section 33 of the *Electricity Act, 1998* requesting that the OEB review a set of market rule amendments made by the Independent Electricity System Operator (IESO) (MR-00439-R00 to -R05: Transitional Capacity Auction). The amendments to the market rules enable the evolution of the IESO's Demand Response Auction into a Transitional Capacity Auction, including to allow participation by certain generators.

The amendments to the market rules were published by the IESO on September 5, 2019 and have an effective date of October 15, 2019.

AMPCO requests that the OEB revoke the amendments to the market rules and refer them back to the IESO for further consideration.

AMPCO also requests that the OEB stay the operation of the market rule amendments pending completion of the OEB's review.

Section 33(9) of the *Electricity Act, 1998* provides that, if the OEB finds that an amendment to a market rule is inconsistent with the purposes of the Act or unjustly discriminates against or in favour of a market participant or class of market participants, the OEB shall make an order revoking the amendment on a date specified by the OEB and referring the amendment back to the IESO for further consideration.

The OEB is required by section 33(6) of the *Electricity Act, 1998* to issue an order that embodies its final decision in this matter within 120 days of the date of receipt of the application.
