To promote transparency, feedback submitted will be posted on the Niagara [engagement webpage](#) unless otherwise requested by the sender.

The Independent Electricity System Operator (IESO) is seeking feedback on the scoping assessment report. A copy of the report and a recording of the presentation can be accessed from the [engagement webpage](#).

Please submit feedback to engagement@ieso.ca by October 5, 2026.

Topic	Feedback
What additional information should be considered as part of the Scoping Assessment?	Through COVID and in an effort to reduce greenhouse impacts on the environment, more and more companies are implementing remote or hybrid work models. Current electricity usage models either are time of day or flat rate. With remote worker and home business models, the

Topic	Feedback
	residential setup does not qualify for commercial programs, and is pushed into an extremely high residential rate. This also impacts the grid demand as more and more brick and mortar business may choose to build on the home office/remote/hybrid model and grids in non-industrial areas may experience higher than average residential use and strain the network.
What additional considerations, informed by local developments, should be taken into account for the areas identified as requiring further analysis?	See above
What other areas or specific considerations should be examined through regional planning?	See above
