

2023 Capacity Auction Fleet-Level Availability De-Rating Factors

As part of the pre-auction capacity qualification process, the fleet-level availability de-rating factors (ADFs) listed below will be applied to the submitted installed capacity of any resource that does not receive its own availability de-rating factor.

If you have any questions or comments regarding the Capacity Auction fleet-level availability de-rating factors, please email Capacity.Auction@ieso.ca.

Capacity Auction Resource Type	Zone	ADF – Summer Obligation	ADF – Winter Obligation
Capacity Generation Resource (Thermal)	All zones	0.94	0.94
