Clean Energy Credits – February 24, 2022

Feedback Provided by:

Name: Laurie Elliott

Title: Manager, Regulatory Policy and Compliance

Organization: Hydro Ottawa Limited

Email: [REDACTED]

Date: March 17, 2022

Following the February 24, 2022 engagement webinar, the Independent Electricity System Operator (IESO) is seeking feedback from stakeholders on the items discussed during the webinar. The webinar presentation and recording can be accessed from the [engagement web page](#).

Please submit feedback to engagement@ieso.ca by March 17, 2022. If you wish to provide confidential feedback, please submit as a separate document, marked "Confidential". Otherwise, to promote transparency, feedback that is not marked "Confidential" will be posted on the engagement webpage.

Opportunities & Challenges

Topic	Feedback
What are the key opportunities and challenges the IESO should be aware of in developing a voluntary clean energy market?	Opportunity - For organizations who are limited in terms of direct reduction and wish to support increased de-carbonization. A clean energy market may also stimulate the development and investment of new renewable energy projects and could provide a competitive benefit to participating customers. Challenge - Organizations that are not focused on reducing their environmental footprint through emissions reduction or offsets, due to upfront costs and/or their business model, may not be open to participating in the CEC market.

Design considerations

Topic	Feedback
Which design considerations outlined in this presentation are most important to you and why?	The program should be administratively efficient, cost-effective, responsive to changing market dynamics, incentivising, equitable and effective in reducing the carbon footprint.

Topic	Feedback
What other design considerations should IESO be aware of?	The resulting program should be scalable and have the potential to integrate with other electricity markets.

Engagement Process

Topic	Feedback
Which stakeholder groups and/or design topics are most important to include in the planned focus group discussions?	Program design factors to consider are: administrative costs to operate, efficiency, transparency, sustainability and economic and customer impacts.

Topic	Feedback
Are there any additional engagement opportunities the IESO should consider?	Need to understand the factors preventing customers from minimizing their carbon footprint and the actions and lead times they would need to transition to a more carbon-neutral operation.

Topic	Feedback
Would you be willing to participate in a technical session? If so, on which topic(s)?	Yes. Any topic that could impact distributor operations or those of its customers.
