To promote transparency, feedback submitted will be posted on the Post Go-Live True-Ups for the Renewed Market engagement page unless otherwise requested by the sender.

- ☐ **Yes – there is confidential information, do not post**
- ☒ **No – comfortable to publish to the IESO web page**

Following the Market Rule Improvements and Change to Governance of Approval of Market Parameters September 16, 2025 engagement webinar, the Independent Electricity System Operator (IESO) is seeking feedback from stakeholders on the items discussed. The presentation and recording can be accessed from the [engagement web page](#).

Note: The IESO will accept additional materials where it may be required to support your rationale provided below. When sending additional materials please indicate if they are confidential.

Please submit feedback to engagement@ieso.ca by September 23, 2025.

MR-00489-R00: Change to Governance for Approval of Market Parameters

What feedback do you have on the proposed amendments related to the governance for approval of market parameters?

OPG thanks the IESO for the opportunity to provide feedback on this engagement and looks forward to working closely with the IESO on this and future engagements.

OPG recommends the Market Rule Amendment Process for the review, revision and approval of market parameters, as the amendment process offers a defined, transparent, and accountable process for all stakeholders. It also demonstrates the IESO's continued commitment to stakeholder engagement and input in the refinement of the market design. OPG would be supportive of market parameter changes if the changes are supported by sound technical analysis, meaningful and transparent stakeholder engagement / consultation, and consideration for stakeholder input, with Technical Panel oversight.

Should the IESO choose to proceed with the proposed governance change, OPG believes it would reduce the IESO Board's governance and oversight of the noted market parameters and could result in the perception of reduced accountability and transparency in the decision-making process of these market parameters. We also note that the removal of IESO Board oversight could also result in reduced market participant (MP) contribution in the development of the new values that has significant material impact on MPs.
