**Subject:** Ontario's DER Potential Study now released in full

The IESO has now published the final DER Potential Study materials on the study's [engagement webpage](#). The study materials consist of the main report, the supplemental methodology/assumptions report, MS Excel appendices, and an update to the results presentation deck delivered during the June 22<sup>nd</sup> engagement session.

We invite you to review the study's final materials, and to submit feedback and questions relating to the study using the posted [feedback form](#). Submissions will be accepted until October 28th.

The IESO will consider this feedback in the organization's future work, including but not limited to DER integration. The IESO will publish a document responding to feedback, and with support of the project consultants, respond to any technical questions relating to the study.

The IESO project team would like to thank you again for your ongoing interest in and contributions towards this exciting project.

Regards,  
IESO Engagement

*+++This is being sent to all participants of the IESO DER Potential Study engagement*
