

Feedback Form

Enabling Resources – October 19, 2023

Feedback Provided by:

Name: Lukas Deeg

Title: Director, Regulatory and Environmental Policy

Organization: Capital Power

Email: [REDACTED]

Date: November 9, 2023

Following the October 19, 2023 webinar on Enabling Resources, the IESO is seeking feedback from participants on considerations for IESO as it establishes timelines for both the implementation of foundational and enhanced models. IESO will work to consider feedback and incorporate comments as appropriate and post responses on the engagement webpage.

The referenced presentation can be found under the October 19, 2023 entry on the [Enabling Resources webpage](#).

Please provide feedback by November 9, 2023 to engagement@ieso.ca. Please use subject: *Feedback: Enabling Resources*. To promote transparency, this feedback, if provided in an AODA-compliant format (e.g. using this form) will be posted on the [Enabling Resources webpage](#) unless otherwise requested by the sender.

Thank you for your time.

Implementation Timelines

Topic	Feedback
<p>Given the updates the IESO presented in the meeting, what would you like the IESO to consider as it establishes timelines for both the implementation of foundational and enhanced models?</p>	<p>Capital Power appreciates the opportunity to provide comments on the IESO’s October 19, 2023 stakeholder engagement session and commends the IESO’s proactive approach in identifying required changes to allow storage, hybrids, and DER to more effectively participate in the wholesale market.</p> <p>In general, Capital Power has no objection to the IESO’s desire to expedite implementation and looks forward to participating in upcoming consultations surrounding these initiatives.</p> <p>Implementation should maintain the key principals of the IAM around competition, efficiency, and reliability. Timing of the shift from foundational to fully enhanced models should consider the actual capacity and in-service dates of projects procured under E-LT1 and LT1, as well as other initiatives involving storage and hybrid assets such as the OEB’s recently proposed changes to facilitate corporate PPAs between load and renewables.</p> <p>Capital Power requests the IESO continue to consider the overall cost-benefit of any required changes as it assesses its timelines and to provide detailed information to stakeholders in the event costs result in implementation delays.</p>
