

# Feedback Form

## Enabling Resources – October 19, 2023

### Feedback Provided by:

Name: Brittany Ashby

Title: Senior Regulatory Affairs Advisor

Organization: Electricity Distributors Association

Email: [REDACTED]

Date: Nov 7 2023

Following the October 19, 2023 webinar on Enabling Resources, the IESO is seeking feedback from participants on considerations for IESO as it establishes timelines for both the implementation of foundational and enhanced models. IESO will work to consider feedback and incorporate comments as appropriate and post responses on the engagement webpage.

The referenced presentation can be found under the October 19, 2023 entry on the [Enabling Resources webpage](#).

**Please provide feedback by November 9, 2023 to [engagement@ieso.ca](mailto:engagement@ieso.ca).** Please use subject: *Feedback: Enabling Resources*. To promote transparency, this feedback, if provided in an AODA-compliant format (e.g. using this form) will be posted on the [Enabling Resources webpage](#) unless otherwise requested by the sender.

Thank you for your time.

## Implementation Timelines

Topic	Feedback
<p>Given the updates the IESO presented in the meeting, what would you like the IESO to consider as it establishes timelines for both the implementation of foundational and enhanced models?</p>	<p>The EDA agrees that the IESO has met the criteria for the enhanced model implementation. We also agree that given the pending system needs for energy and capacity, that DERs have the potential to fill an important need within the electricity system.</p> <p>With respect to timelines for implementation of both the foundational and enhanced model, we request that the IESO consider alignment with the Transmission-Distribution Working Group, which is currently focusing on the role of LDCs with respect to DER integration, and T-D coordination. The T-D coordination can impact design features related to DERs, such as aggregation type, aggregation size, and metering &amp; settlement.</p>

## General Comments/Feedback

The EDA recognizes that LDCs have an important role to play in the energy transition. We are actively participating in several forums related to DER integration with both the IESO and the OEB. We look forward to continued discussions and collaboration. EDA continues to monitor the progress of MRP completion timelines and maintains that it is appropriate to continue a revision of scope for ERP as MRP aspects are completed.
