Subject: IESO Technical Panel (TP) Seeking Energy Storage Representative

Energy Storage Advisory Group:

In 2019, the TP spent a significant amount of time reviewing its process, composition and potential enhancements to the [Terms of Reference](#) (ToR). As part of that review and discussion, the TP benefited from the advice from many stakeholders that included a recommendation for the IESO to communicate when a search for new members was underway with relevant active forums in order to help support advertising the opportunity with their respective professional networks.

Therefore, we wanted to notify ESAG that the IESO has issued a call for nominations for an energy storage resource representative (as well as a renewable generator representative). This [IESO Bulletin article](#) contains the pertinent information for sharing this current opportunity with others you may think would be interested and qualified, most notable the deadline for applications is end of business on May 28, 2020. If you have any questions at all, please do not hesitate to reach out to TP Secretariat, Jason Grbavac (Jason.grbavac@ieso.ca) or IESO Engagement (engagement@ieso.ca).

Regards,
IESO Engagement
