Subject: Phasing out Ontario's Gas-Fired Power Plants

Chuck Farmer
Senior Director, Power System Planning
IESO
Toronto, Ontario

Dear Mr. Farmer,

I urge you to phase out gas-fired power plants in Ontario. In doing this, the IESO should make a huge contribution to our reduction of carbon emissions.

This is important in the fight against climate change.

Alternative forms of energy must be found in solar, wind, and Quebec hydro.

We can do it.

Sincerely,
Kathy Garneau
