Subject: Feedback on Gas PhaseOut Impact assessment

As a grandparent, I represent the “everyday” citizen of Ontario, a voter, taxpayer and most importantly a caregiver that is concerned that every day there is more evidence that our children’s health, well-being, and future existence is being directly and seriously impacted by climate change.

It’s clear on all counts that phasing out gas and transitioning to renewable energy would have multiple short and long-term benefits to the health and well-being of Ontarians; ramping up gas-plant production would have the opposite effect.

IESO’s assessment must consider the social and environmental costs and benefits along with the immediate and long-term costs in terms of dollars and cents for producers and consumers.

History of phasing out coal-fired plants has had a significant positive impact on our environment and our health.

Please do what matters for our next generations!

Stay Safe & Healthy, Peter Wilkins
