Feedback: Industrial Energy Efficiency Program

For context, the questions below are taken from slides 22 to 25 from the June 23, 2021 [presentation](#) posted on the [engagement webpage](#).

General

Topic	Feedback
Are there any key areas of interest and/or concern on the draft program proposal and framework presented today?	Energy Storage Canada is interested in understanding how energy storage facilities, primarily Behind the Meter (BTM), could be eligible in this program.

Participant Eligibility

Topic	Feedback
Should the program allow for aggregation of projects at different sites by the same participant?	Yes, aggregation should be allowed as it may better optimize the effectiveness of the solutions offered to larger C&I customers.

Topic	Feedback
Should third parties be allowed to submit projects if they have the necessary authorization to deliver?	Click or tap here to enter text.

Project Eligibility

Topic	Feedback
What questions do you have about technologies or projects that would be eligible under this program, given the definition of CDM?	It is unclear how energy storage facilities, specifically BTM, could be eligible under this program and to what degree.

Topic	Feedback
Are the minimum size and maximum incentive award thresholds reasonable?	Click or tap here to enter text.

Topic	Feedback
What should be considered when enabling stacking of incentives?	Click or tap here to enter text.

Project Selection Framework

Topic	Feedback
Does the two-stage project selection framework presented today support or challenge your internal business processes?	Click or tap here to enter text.
Topic	Feedback
Are there any related key considerations that the IESO should consider in developing the two stages? Any required timing?	Click or tap here to enter text.
Topic	Feedback
What are some key outputs from a stage I approval that would help facilitate your business processes?	Click or tap here to enter text.
Topic	Feedback
What are considerations that should be applied to the weighting of selection criteria? Are there additional criteria IESO should consider?	Click or tap here to enter text.

General Comments/Feedback

Energy Storage Canada requests for the IESO to not restrict the eligibility of BTM storage in the IEE program. BTM storage is not promoted through other government programs, regulations or subsidies. While the ICI sends a price signal to shift consumption, it is not solely focused on promoting the use of BTM energy storage facilities to help C&I customers better manage their consumption.
